Title Tag

Agência de Marketing Digital RJ - SEO - Web Design | Rio X MKT™

Length: 63 character(s) (485 pixels)

Your HTML title tag appears in browser tabs, bookmarks and in search result pages.

Make your title tags clear, concise (65 characters, 200-569 pixels) and include your most important keywords.

Check the title tags for thousands of pages at once using [Site Crawl](#).

Meta Description

Agência de Marketing Digital RJ especializada em SEO, Criação de Websites, Otimização de Sites e Gestão de Redes Sociais.

Length: 121 character(s) (738 pixels)

Great, your [meta description](#) contains between 70 and 160 characters spaces included (400 - 940 pixels).

A good meta description acts as an organic advertisement, so use enticing messaging with a clear call to action to maximize click-through rate. They allow you to influence how your web pages are described and displayed in search results.

Ensure that all of your web pages have a unique meta description that is explicit and contains your [most important keywords](#) (these appear in bold when they match part or all of the user's search query).

Use WooRank's [Site Crawl](#) to check thousands of pages for meta descriptions that are too long, too short or duplicated across multiple web pages.

Agência de Marketing Digital RJ - SEO - Web Design | Rio X MKT™

Agência de Marketing Digital RJ especializada em SEO, Criação de Websites, Otimização de Sites e Gestão de Redes ...

This is a representation of what your title tag and meta description will look like in Google search results for both mobile and desktop users. Searchers on mobile devices will also see your site's favicon displayed next to the page's URL or domain.

Search engines may create their own titles and descriptions if they are missing, poorly written and/or not relevant to the content on the page and cut short if they go over the character limit. So it's important to be clear, concise and within the suggested character limit.

Check your title tag and meta description to make sure they are clear, concise, within the suggested character limit and that they convey the right message to encourage the viewer to click through to your site.

Headings

<H1>	<H2>	<H3>	<H4>	<H5>
1	13	8	0	2
<H1>	Soluções Inteligentes em Uma Só Agência de Marketing Digital			
<H2>	Soluções Inteligentes de			
<H2>	Marketing Digital			

Great, your website is structured using HTML headings (<H1> to <H6>).

Use your keywords in the headings and make sure the first level (<H1>) includes your most important keywords. Never duplicate your title tag content in your header tag.

While it is important to ensure every page has an <H1> tag, only include more than one per page if you're using HTML5. Instead, use multiple <H2> - <H6> tags.

This data represents the words and phrases that your page appears to be optimized around. We use what's called "natural language processing" (NLP), which is a form of artificial intelligence that allows computers to read human language, to do this analysis.

The numbers next to each word or phrase represents how often we detected them and their variants on the page.

Are these the keywords you want to target for your page? If so, great! Track your site's rankings in Google search results using [WooRank's Keyword Tool](#).

If these keywords aren't relevant to your page, consider updating your content to optimize it for your target keywords.

Alt Attribute

We found 21 images on this web page.

2 ALT attributes are missing.

<https://rioxmarketing.com/wp-content/uploads/2018/08/otimizacao-de-sites-2018-o...>

data:image/gif;base64,R0lGODlhAQABAIAAAAAAAP///yH5...

Alternative text allows you to add a description to an image. Since search engine crawlers cannot see images, they rely on alternative text attributes to determine relevance to a search query. Alternative text also helps makes an image more likely to appear in a Google image search and is used by screen readers to provide context for visually impaired users.

It looks like you're missing alternative text for 2 images on rioxmarketing.com. Check the images on your website to make sure accurate and relevant alternative text is specified for each image on the page.

Try to keep your alternative text to a simple, one-sentence description of what's in the image.

We've discovered 8,012 pages on rioxmarketing.com.

Discovered pages do not impact your ranking but this is very handy information to have to make sure that your site's pages are being indexed correctly.

A low number can indicate that bots are unable to discover your pages, which is commonly caused by bad site architecture and poor internal linking. Or you've unknowingly prevented bots and search engines from crawling and indexing your pages. An unusually high number could be an indication of duplicate content due to URL parameters.

Make sure your website's [XML sitemap](#) is present and that you've submitted it to the major search engines. [Building backlinks](#) to your website's internal pages will also help bots to discover, [crawl and index](#) them, while building authority to help them rank in search results at the same time.

Check Index Status and Crawl Errors in [Google Search Console](#) to track the status of your crawled/indexed pages.

If the number shown here doesn't sound right, we recommend to use [WooRank's Site Crawl](#) analysis to find out why.

If you use parameters in your URL like session IDs or sorting and filtering, use the `rel="canonical"` tag to tell search engines which version of those pages is the original.

✓ In-Page Links

We found a total of 38 link(s) including 1 link(s) to files

- External Links: NoFollow (2.6%)
- External Links: Follow (17.2%)
- Internal Links (80.1%)

Anchor	Type	Follow
agencia-estado-sp	External Links	Follow
mun-do-marketing	External Links	Follow
No Anchor Text	External Links	Follow
No Anchor Text	External Links	Follow
No Anchor Text	External Links	Follow
No Anchor Text	External Links	Follow

Links pass value from one page to another. This value is called 'link juice'.

A page's link juice is split between all the links on that page so lots of unnecessary links on a page will dilute the value attributed to each link. There's no exact number of links to include on a page but best practice is to keep it under 200.

Using the [Nofollow](#) attribute in your links prevents some link juice, but these links are still taken into account when calculating the value that is passed through each link, so using lots of NoFollow links can still dilute PageRank.

Check your site's internal linking using [Site Crawl](#).

Hreflang Tags

No hreflang tags were found on this page

The [hreflang tag](#) is an HTML tag that tells search engines which languages and (optionally) countries a page's content is relevant for. Hreflang tags also tell search engines where to find the relevant content in alternate languages.

If your website targets users all around the world, using hreflang tags will help make sure the right content is being served to the right users.

The value of the hreflang attribute identifies the language (in ISO 639-1 format) and optionally a region in ISO 3166-1 Alpha 2 format of an alternate URL.

Use [WooRank's Site Crawl](#) to perform a thorough check on hreflang validity across a website.

Broken links

No broken links were found on this web page

[Broken links](#) send users to non-existent web pages. They hurt a site's usability and reputation, which impacts SEO.

Fortunately your page doesn't contain any broken links.

Be proactive in checking your pages to make sure they don't have any broken links.

See the [HTTP status](#) for potentially thousands of links using [Site Crawl](#).

WWW Resolve

Great, a redirect is in place to redirect traffic from your non-preferred domain.

All versions of your page point to the same URL.

URL	Resolved URL
http://rioxmarketing.com/	https://rioxmarketing.com/
http://www.rioxmarketing.com/	https://rioxmarketing.com/
https://rioxmarketing.com/	https://rioxmarketing.com/
https://www.rioxmarketing.com/	https://rioxmarketing.com/

Search engines see www.rioxmarketing.com and rioxmarketing.com as different websites. This means they could see a large amount of duplicate content, which they don't like.

Fortunately your website redirects www.rioxmarketing.com and rioxmarketing.com to the same site.

Robots.txt

<https://rioxmarketing.com/robots.txt>

A [robots.txt file](#) allows you to restrict the access of search engine crawlers to prevent them from accessing specific pages or directories. They also point the web crawler to your page's XML sitemap file.

Your site currently has a robots.txt file. You can use Google Search Console's Robots.txt Tester to submit and test your robots.txt file and to make sure Googlebot isn't crawling any restricted files.

See the pages you've disallowed with your robots.txt file with [Site Crawl](#).

✓ XML Sitemap https://rioxmarketing.com/sitemap_index.xml
Ⓞ Ⓞ Ⓞ ⚙ ⚙ ⚙
<https://rioxmarketing.com/post-sitemap.xml>
<https://rioxmarketing.com/page-sitemap.xml>

XML sitemaps contain the list of your URLs that are available to index and allow the search engines to read your pages more intelligently. They can also include information like your site's latest updates, frequency of changes and the importance of URLs.

Be sure to only include the pages you want search engines to crawl, so leave out any that have been blocked in a robots.txt file. Avoid using any URLs that cause redirects or error codes and be sure to be consistent in using your preferred URLs (with or without www.), correct protocols (http vs. https) and trailing slashes. You should also use your robots.txt file to point search engine crawlers to the location of your sitemap.

✓ Sitemaps Validity Ⓞ Ⓞ Ⓞ ⚙ ⚙ ⚙
✓ All sitemaps are within the file size limit
✓ All sitemaps are within the URL count limit
✓ All sitemaps have a valid structure
✓ All sitemaps are accessible
✓ The sitemaps in your robots.txt file use a valid URL format

Great! Your sitemaps seem to be valid

To learn more about what a valid sitemap should look like check out our [guide about XML Sitemaps](#) or submit it through [Google Search Console](#).

◉ URL Parameters Good, the URLs look clean.

URL parameters are used to track user behaviors on site (session IDs), traffic sources (referrer IDs) or to give users control over the content on the page (sorting and filtering). The issue with URL parameters is that Google sees each unique parameter value as a new URL hosting the same thing - meaning you could have a [duplicate content](#) problem. Sometimes, it's able to [recognize these URLs](#) and group them together. It then algorithmically decides which URL is the best representation of the group and uses it to consolidate ranking signals and display in search results. You can help Google recognize the best URL by using the `rel="canonical"` tag.

Use the [URL Parameters Tool](#) in Google Search Console to tell Google how your URL parameters affect page content and how to crawl URLs with parameters. Use this tool very carefully - you can easily prevent Google from crawling pages you want indexed through overly restrictive crawling settings, especially if you have URLs with multiple parameters.

Check the On-Page section of [Site Crawl](#) to identify any duplicate content issues.

✓ Underscores in the URLs Ⓞ Ⓞ Ⓞ ⚙ ⚙ ⚙
Great, you are not using underscores (these_are_underscores) in your URLs.

Great, you aren't using [underscores](#) (these_are_underscores) in your URLs.

Google sees hyphens as word separators while underscores aren't recognized. So the search engine sees [www.example.com/green_dress](#) as [www.example.com/greendress](#). The bots will have a hard time determining this URL's relevance to a keyword.

✓ Domain Registration

Created 5 years ago

Expires in 9 months

Your domain, rioxmarketing.com, is the human-readable address of your website on the Internet.

Domain age and registration won't impact a website's rankings, but it's important to keep your registration up to date to prevent someone else from buying it.

Your domain is the human-readable address of your website on the Internet. How long your domain name has been registered does have a limited impact on your rankings in search results. The newer your domain the harder it can be to achieve a higher rank. To help offset this, consider buying a [second-hand domain name](#).

Do you know that you can register your domain for up to 10 years? By doing so, you will show the world that you are serious about your business.

Schema.org

WebPage 2 Service 1 ImageObject 1

Great, we detected Schema.org items on your webpage.

Schema.org is a set of vocabularies used to add meaning to the information on a webpage in a way that is readable by machines (Google).

Schema.org includes attributes for entities, relationships between entities and actions.

These vocabularies can be added to a page using many different encodings, including RDFa, Microdata and JSON-LD.

Learn more in [Google's intro to structured data](#).

Open Graph Protocol

RIOXMARKETING.COM

Agência de Marketing Digital - SEO - ...

Agência de Marketing Digital especializad...

Tag

og:type	website
og:image	https://rioxmarketing.com/wp-content/uploads/2015/12/17903361_1453279444703434_7...
og:url	https://rioxmarketing.com/
og:title	Agência de Marketing Digital - SEO - Web Design Rio X Marketing™
og:description	Agência de Marketing Digital especializada em Inbound Marketing, SEO, Criação de Websites, Email Marketing, Gestão de Redes Sociais, Marketing De Conteúdo

Great, we detected open graph tags on your webpage.

Facebook developed the [Open Graph](#) protocol to enable the integration of any web page with its social media platform. Other social media platforms have also adopted the protocol, allowing you to control how your web pages are presented when shared across social media.

Designed for humans first and machines second, [microformats](#) use code (HTML/XHTML tags) originally intended for other purposes to add context to the content on a webpage. This helps machines (like Google!) to understand certain information (contact information, geographic coordinates, calendar events, etc.) intended for humans.

✓ Mobile Friendliness

Very Good

This web page is super optimized for Mobile Visitors

Mobile friendly pages make it easy for users to complete objectives and common tasks and use a design or template that is consistent across all devices (uses responsive web design).

Your site is well configured for mobile users.

◉ Mobile Rendering

This is how your website appears when displayed on different mobile devices.

With more than half of all Google search queries originating on a mobile device, it is important to make sure your mobile site is optimized for these users.

✓ Tap Targets

Perfect, your page's tap targets are big enough and have enough space between them.

Great, your links and buttons are big enough to be easily tapped and spaced enough so that a user's finger pressing on one tap target does not inadvertently touch another tap target.

✓ Plugins

Perfect, no plugin content detected.

Great, your website does not embed any special types of web content, such as Flash, Silverlight or Java, so your content can be accessed on all devices.

✓ Font Size Legibility

Perfect, this web page's text is legible on mobile devices.

At least 60% of your page's font size is 12 pixels or greater.

✓ Mobile Viewport

- ✓ Great, a configured viewport is present.
- ✓ The content fits within the specified viewport size.

Great, the **viewport** is well configured.

Keep in mind that since the width (in CSS pixels) of the viewport may vary, your page content should not solely rely on a particular viewport width to render well. Consider these additional tips:

- Avoid setting large absolute CSS widths for page elements.
- If necessary, **CSS media queries** can be used to apply different styling depending on screen size.
- Ideally, serve responsively-sized images.

🔍 Mobile Frameworks

No mobile frameworks have been detected.

Mobile or **responsive frameworks** are an important part of website optimization as they assist developers in creating applications which are applicable to multiple devices.

🔍 AMP

- ✓ Your page links to a valid AMP page.

<https://rioxmarketing.com/?amp>

AMP is an open-source library that provides a straightforward way to create web pages that are compelling, smooth, and load near instantaneously for users.

Check your AMP markup with the [AMP validator](#).

URL rioxmarketing.com
Length: 13 character(s)

Keep your URLs short and clean and avoid long domain names when possible.

A descriptive URL is better recognized by search engines. A user should be able to look at the address bar and make an accurate guess about the content of the page before reaching it (e.g., <http://www.mysite.com/en/products>).

Keep in mind that URLs are also an important part of a comprehensive [SEO strategy](#). Use clean URLs to [make your site more "crawlable" by Google](#).

Resource: Search for a [good domain name](#). If no good names are available, consider a [second hand domain](#). To prevent brand theft, you might consider trademarking your domain name.

Favicon Great, your website has a favicon.

[Favicons](#) are the small icons that represent a website, company and/or brand. They can be displayed (among other instances) in browser tabs or bookmarks. Google also displays favicons in a page's search snippet in mobile search results.

You can see how your site's favicon appears in search results in the Google Preview above.

Make sure your favicon is [consistent with your brand](#) to help improve visibility.

✓ Custom 404 Page Great, your website has a custom 404 error page.
 Your server responded with the HTTP status code: 404

[Custom 404 error pages](#) are an opportunity for you to reduce customer frustration and link to other pages on your site.

✓ Asset Minification Perfect, all your assets are minified.

Great! We didn't find unminified assets on your web page.

To learn more on how to enable [minification](#) for your assets, consult [Google's PageSpeed Insights guide on minification](#).

✓ Asset Compression Perfect, all your assets are compressed.

Great! We didn't find uncompressed assets on your web page.

[Compressing assets](#) reduces the amount of time it takes a user's browser to download files from your server. Enabling compression is an important part of reducing the amount of time it takes your website to load.

✓ Asset Cacheability

Perfect, all your assets are cached.

Great! We didn't find uncached assets on your web page.
[Enabling caching](#) for your website makes your site load faster for repeat visitors.

To learn more on how to make your website faster, check out these [tips to decrease page load time](#).

✓ Language

Declared: *Portuguese*

Detected: *Portuguese*

Great, your declared language matches the language detected on the page.

Make sure your declared language is the same as the [language detected by Google](#).

Tips for multilingual websites:

- Define the language of the content in each page's HTML code.
- Specify the language code in the URL as well (e.g., "mywebsite.com/fr/mycontent.html").
- Use [hreflang tags](#) to specify language and country for Google, and the "content-language" meta tag to specify the language and country for Bing.

🔍 Domain Availability

Domains	Status
rioxmarketing.net	Available. Register it now! ✓
rioxmarketing.org	Available. Register it now! ✓
rioxmarketing.info	Available. Register it now! ✓
rioxmarketing.biz	Available. Register it now! ✓
rioxmarketing.eu	Available. Register it now! ✓

[Register](#) the various extensions of your domain to protect your brand from cybersquatters.

🔍 Typo Availability

Domains	Status
rioxmarketingg.com	Available. Register it now! ✓
rioxmsrketiing.com	Available. Register it now! ✓
rioxmarke6ing.com	Available. Register it now! ✓
ripxmarketing.com	Available. Register it now! ✓
rioxmareting.com	Available. Register it now! ✓
ruoxmarketing.com	Available. Register it now! ✓

[Register](#) the various typos of your domain to protect your brand from cybersquatters.

🔍 Email Privacy

Good, no email address has been found in plain text.

We don't recommend adding plain text/linked email addresses to your webpages, as malicious bots scrape the web in search of email addresses to spam. Instead, consider using a contact form.

Server IP

107.180.118.248

Server location: Scottsdale

Your server's IP address has little impact on your SEO. Nevertheless, try to host your website on a server which is geographically close to your visitors. Search engines take the geolocation of a server into account as well as the server speed.

Use [DNSstuff](#) for comprehensive reports on your server.

Technologies

-  Apache
-  Chart.js
-  Google Font API
-  Google Maps
-  MediaElement.js
-  Modernizr
-  PHP
-  prettyPhoto
-  WordPress
-  WP Rocket

Get to know the technologies used for your website. Some codes might slow down your website. Ask your webmaster to take a look at this.

Analytics

-  Google Analytics
-  Google Search Console

Web analytics let you measure visitor activity on your website. You should have at least one analytics tool installed, but it can also be good to install a second in order to cross-check the data.

Popular Analytics Tools Include: [Google Analytics](#), [Quantcast™](#), [AdobeAnalytics™](#), [Piwik™](#), [chartbeat™](#), [Clicky™](#), [ClickTale™](#), etc.

Doctype

HTML5

The Doctype is used to instruct web browsers about the document type being used. For example, what version of HTML the page is written in.

Declaring a doctype helps web browsers to render content correctly.

✓ Encoding

Great, language/character encoding is specified: utf8

Specifying language/character encoding can prevent problems with the rendering of special characters.

✓ SSL Secure

Great, your website is SSL secured (HTTPS).

- ✓ Your website's URLs redirect to HTTPS pages.
- ✓ Your website is configured with HSTS.
- ✓ The SSL certificate expires in 5 months.
- ✓ The certificate issuer is Sectigo Limited.

Modern websites tend to be SSL secured (HTTPS) as it provides an extra security layer while logging in to your Web Service. In 2014, Google announced that an HTTPS (vs HTTP) website would receive an extra boost in their ranking.

While switching to HTTPS, make sure your site remains optimized and see to it that your website will still run quickly. Follow these best practices for a smooth transition:

- Use a serious issuer to purchase your SSL certificate
- Redirect all of your HTTP pages to the HTTPS version of your website
- Use [HTTP Strict Transport Security \(HSTS\)](#) in your headers
- Renew your SSL certificate every year, before it expires
- Make sure that all of your content (CSS, etc.) is linked to HTTPS
- Update your XML sitemap to ensure the URLs include HTTPS and update the robots.txt file to reference this version
- Register the HTTPS website in Google & Bing Search Console/Webmaster Tools

Backlinks Score

Good

The backlinks score is calculated by looking at a combination of link signals. This includes the overall number of backlinks together with the number of linking domains, as well as rating the overall quality of the backlinks pointing to a website. The quality assessment is based on the linking pages.

Use these WooRank guides to [audit your links](#), [evaluate their quality](#), [build new links](#) and [reclaim old links](#).

Backlinks Counter

103,265

We've detected 103,265 backlinks pointing to your site.

Backlinks are links that point to your website from other websites. They are like letters of recommendation for your site.

Check out our guide on [how to build links for SEO](#). If your backlink counter is high, keep an eye on the [quality of the links](#) coming your way.

Referring Domains

187

This number tells you the number of domains linking back to your site. If you have lots of backlinks but a low backlink score, having a lot of links from low-quality social media or blogging platforms could be the cause.

Social Media Engagement

Your homepage is sometimes shared on social networks.

Facebook Shares	272
Facebook Comments	1
Facebook Likes	9

The impact of social media is huge for certain industries.

Make sure you have opened social media profiles on [Facebook](#), [Pinterest](#), [LinkedIn](#), and other sites that are of interest to your customers.

Learn how to [engage](#) your social media audiences and create a consistent fan base. You can also [use your website](#) to increase your popularity on social platforms.

[Check these helpful tools](#) for managing your social media campaign.

Note: This data represents [engagements](#) from like and share buttons on your site or people copying and pasting your URLs directly into Facebook. It does not count likes and shares from your social media branded pages.

Great, we found the Instagram account linked to rioxmarketing.com.

There are over 800 million Instagram accounts active every month, and 500 million of those are active every single day. This means that when it comes to content, you've got about 800 million potential sets of eyes ready to enjoy your content.

Use your social media audience to unearth insights for your digital marketing.

Local Directories

Add your [Google My Business profile](#) or create one

Add your [Yelp page](#) or create one

This is a list of the local directories where your business has been found. Take care of your listings in local directories; since maps are now an integral part of search results, your [Google My Business page](#) may have more visitors than your website!

It is important to make sure that your business details are correct in each directory where you are listed. Find the directories in your country ([USA](#), [UK](#) and [Canada](#).) and enhance your listings with pictures, video, schedules and as many customer reviews as possible.

Online Reviews

No local reviews found.

These are the latest reviews of your business that can be found in local directories. Surveys show that 90 percent of customers say buying decisions are influenced by [online reviews](#) so take the time to make a good impression and [gather positive feedback](#). [Strategies for gaining reviews](#) may differ by audience or business type; in general, consider asking for reviews, making it easy to send in feedback and having a prominent social presence.

Traffic Estimations

Very Low

This shows your estimated traffic for rioxmarketing.com compared to any competitors you have chosen. We use [Alexa](#) for this information.
